

Target Store Expansion

Progressive Consulting Engineers, Inc. (PCE) provided civil engineering design services to the Ryan companies design/build team for a new 140,000 square foot Target Store on a 17.6 acre site in North St. Paul, MN.

The project required close coordination between the designer, builders, Target, and the City of North St. Paul. The challenge on this project was to maintain the operation of the existing Target Store, while the new Target Store was under construction.

PCE was directly responsible for:

- * Site demolition plan
- * Layout of a new 800 stall parking lot
- * Site grading and drainage
- * Erosion control design
- * Utility design (storm sewer, sanitary sewer, and watermain)
- * Coordination of temporary parking facilities

Client: Ryan Construction
Client Contact: Jim Tucker
Construction Year: 1999
Fee: \$42,000
