

Emergency Streambank Protection Blue Earth County

The Saint Paul District Office of the U. S. Army Corps of Engineers authorized a Section 14 Emergency Streambank Protection Project for Blue Earth County State Aid Highway 28, Sites A and B, to protect approximately 500 feet of C.S.A.H. 28 that were threatened by ongoing erosion of the adjacent bank of the LeSueur River and an unnamed tributary. The cause of erosion was determined to be a combination of river erosion and ground water seepage.

Progressive Consulting Engineers, Inc. (PCE) completed a Feasibility Report and Environmental Assessment and designed the riprap protection for the site.

Client: US Army Corps of Engineers, St. Paul District

Client Contact: Nathan Kathir

Construction Year: 2000

Project Cost: \$195,000

Emergency Streambank Protection Nicollet County

The Saint Paul District Office of the U. S. Army Corps of Engineers authorized a Section 14 Emergency Streambank Protection Project for MN T.H. 169 in Nicollet County to protect approximately 300 feet of T.H. 169 that was threatened by ongoing erosion of the adjacent bank by the Minnesota River. The cause of erosion was determined to be a combination of river erosion and overland flow.

Progressive Consulting Engineers, Inc. (PCE) completed a Feasibility Report and Environmental Assessment and designed the riprap protection for the site.

Client: US Army Corps of Engineers, St. Paul District

Client Contact: Nathan Kathir

Construction Year: 2000

Project Cost: \$179,000
